

## Appendix B: Survey Comments

---

### **Q4. What specific issue would influence you to vote in the election in November 2005?**

The jail issue.

The transportation issue.

I always vote.

The problems with previous elections.

The area is large enough to have a transit system.

Nothing except public land issues.

The school issue.

The tax issue.

I do not have enough information to say at this time.

The city bought the old SAE house & I consider it money misspent.

The state sales tax and the relief of personal property taxes.

I vote in all elections.

The funding issues involved.

The open space measure issue.

The transportation issue.

The public transit would be great.

To know what is going on.

The state tax on goods & services; sales tax issues.

The local city council elections.

Almost any issue, the transportation issue.

I always vote.

The property tax issue.

The gay marriage issue.

It is my duty to vote.

The taxes, houses and job issues.

The war, economy, plan growth, and four corners water system issues.

I'm not sure.

I vote for any reason.

The special elections.

The gay marriage issue.

The environmental issues.

The medical program for prescriptions issue.

More issues about streets & traffic.

I always vote.

There aren't any specific issues, I always vote.

I always vote.

Would depend on what issues were on ballot.

Terror issues, economy, and abortion would be some issues that would influence me to vote.

I just vote as my civic duty.

I vote in all elections.

The jail issue.

I always vote no matter what the issue is.

I always vote.

I like what George Bush is doing in the White House.

It is important to give your opinions.

The transportation issues.

The property tax issues.

If the taxes would be raised.

I vote because it is my duty.

I am a dedicated voter.

Health care issues.

Depends on what is on the ballot and the transportation issue and all others.

None, I do not have any issues in mind to vote for.

Anything that affects my family.

I always vote.

I don't know, I always vote, period.

If the cyanide ban was lifted.

Growth and transportation issues.

The public bus services.

A transit system.

The jail issues, and raising property taxes.

Education issues and Medicare issues would influence me to vote.

Environmental issues would influence me to vote.

I always vote.

I vote at every election.

I always vote.

It depends on what comes up.

I always vote.

Education issues.

Issues that would influence me to vote would be a performing center, traffic issues and the local environment.

I am new to the area, I'm not aware of the local issues at this time.

Any tax questions would influence me to vote.

Any basic issues that involved my community would influence me to vote.

I always vote.

I always vote.

Montana supreme court election needs a change.

An abortion law.

Marriage issues and transportation for buses.

Any general issues.

Giving people tickets for driving in the bike lane.

I am new to the area so I do not know.

The availability of non-motorized transportation, traffic safety, availability of low income housing and construction of a new high school.

The public transportation.

The gay marriage issue.

It is my civic duty to vote.

A state sales tax.

The property taxes issue.

Open land space would be a specific issue that would influence me to vote.

Public transit issues would influence me to vote.

I always vote.

Environmental issues would influence me to vote.

I always vote.

Public transportation, open land initiative, jail funding and public school funding are all influential issues.

If property taxes were going to be raised to fund transportation services for people other than the elderly, disabled and MSU students.

Only healthcare issues would influence me to vote. I want to vote to reduce the price of prescription drugs for seniors and low income residents.

The transportation issues are my major concern. I would vote only if I knew the formation of a regional bus system was going to be funded by sales tax and not property tax.

The healthcare issues and transportation issues that would cause an increase in my sales tax.

Those pertaining to public school funding or anything that would help improve the quality of education for all ages.

I don't know what would be important a year from now. I will know the issues more six months prior to the election, ask me then.

The county jails funding resources is a major concern to me now. I don't know if it will be in November of 2005.

If I could vote I would vote. I can't vote because I am a felon. I can not drive my 3 kids around, myself to work, the store or anywhere else, because my license has been revoked. I must at least have the option of Galavan or some other public transit system.

I vote at all elections.

The transportation issue.

The jail issue.

The transportation issues on the ballot.

I would like to see an issue to get the roads around here fixed.

The transportation issue.

The bond issues.

The transportation issue.

I'm not sure.

I will vote regardless.

I'm not sure.

The development and education issues.

I'm not sure.

The future needs of our area.

Because I always vote.

The public transit issue.

I'm not sure.

I vote in all elections.

It does not matter, I will just be voting.

I'm not sure, but maybe to control development.

The sales tax issue.

The same sex marriage issue.

The school bonds issue.

I vote in every election not matter what the issue is.

If the mining issue is on the ballot, I will get to the polls.

New homes vs. existing ones. New construction issues vs. improving housing that is already there.

I always vote no matter what the issues.

I am a seasonal resident, not registered to vote in Montana. I do own property here though, so I am aware of the issues.

The issues regarding open space.

I always vote.

I vote in every election.

The transportation issues on ballot.

I always vote.

I always vote.

I always vote.

I vote in every election.

There is nothing now.

Issues like health care, job security, war on terror issues affecting local safety, and transportation issues dealing with property tax increases.

Bike safety is a problem in our county. Pedestrians and bikers are casualties of hit and runs by cars on major roads and around residential areas. My wife and I are both survivors of hit and runs while riding our bikes.

A new county jail, it is needed badly & I don't know why they don't build it.

The issues to get a handle on growth. It is out of control. Those in charge need to act on input & surveys before they are so old all they build are white elephants.

The jail bond & open space.

Because of increased taxes on the ballot.

I always vote.

I always vote.

The transit system & bond issues. If they are too many I would pick and choose.

Because of the tax increases.

I vote anyway.

I just vote.

I have no idea.

Because I always vote.

Because of any issue.

I'm not sure.

I'm not sure of any reason.

I am not sure.

I'm not sure.

I'm not sure.

The flow of traffic & the city streets.

There isn't any reason.

I'm not sure.

I always vote.

Everything, I always vote.

The economic issues.

The "no child left behind" program and healthcare.

I am unsure.

Because of the transportation issues and the need for this service.

No comment.

It is my duty as a citizen to vote.

The transportation issue.

I always vote.

The open space issue.

I always vote no matter what the issue is.

Road and traffic conditions.

I have no idea.

I'm not sure.

I vote at every election.

I always vote, it doesn't matter about what issue.

What would influence me to vote would be a property tax increase.

The population growth issue.

I'm not sure.

I don't know yet.

I don't know.

Representatives for the state.

The traffic in town.

Because I am registered.

Nothing.

I am not sure.

The issues about the school levy.

Issues that would influence me to vote would be transportation issues and a new jail.

The issues about bonds for open space.

No specific issue would influence me, I always vote.

Nothing, I always vote.

Depends on what is happening.

I just will vote.

I don't know.

Nothing.

I don't know.

None yet.

Nothing.

To keep property taxes down.

I vote in every election regardless.

I don't know.

I don't know.

I can't vote, I'm not registered.

I don't vote and I'm not sure if I ever will.

Ways to not raise my property taxes.

I'm really not sure because I haven't thought about it.

I vote all the time.

The school budget issue.

I always vote.

The transportation issue.

I always vote.

The Presidential election is very important to vote in November this year. I don't know about next year.

It depends on what our needs are, and what was on the list to vote for that I wanted to vote for.

The transportation issue.

The property tax issue.

I always vote.

I always vote.

I always vote.

The gay marriage issue.

I don't know yet.

I'm not sure.

Nothing would.

The transportation and lower taxes issue.

The public transportation issues.

The transportation, traffic and school tax issues.

I'm not sure because all of the issues are important to me and I have trouble picking out specific issues.

I have been voting since I was 21 and I am 83 now so I don't know how to answer this question.

Specific issues that would influence me to vote are helping the environment and bringing mining back safely.

I would vote in the election in November 2005 if they place the transit service issue on the ballot because I think it is an excellent idea.

I always vote no matter what so I am not sure because I never really thought about it.

I don't vote.

No specific issue, I always vote no matter what election.

I vote at every election.

The school system issues.

The jail or transportation issues.

The open space bond issue.

I just vote anyway.

I don't know.

I would like to see a well organized bus service and a study done as to what demand would be for users.

It doesn't matter, I try to vote in every election.

The availability of transportation and convenience.

It doesn't matter because I always vote no matter what.

I am not much of a political person.

I am not sure. I am still thinking on choosing who will be the President.

I just moved here, so I would just like to vote here.

I always vote.

I am not sure.

I always vote, no matter what the issues.

I vote every chance I get. I don't need any influence.

I vote all the time.

I don't need any influence. I just always vote.

The transportation issue.

The transit service issue.

I'm not sure.

The local open space bond issue.

All of the issues, I always vote.

If there was an issue on abortion.

I don't know.

I don't know.

I don't know.

I don't know. We are concentrating on the November of 2004 issues, but we will vote; we vote in every election.

I don't know at this time.

I don't know.

I would like better road maintenance and traffic control.

I don't know.

I'm not sure.

The tax reforms.

I don't know.

I'm not sure.

**Q5. What would influence your choice to vote for or against an initiative to start a bus system?**

To know more about the cost and the funding.

It depends on how it is funded.

I am for it for the people who would use it and it would reduce traffic.

It would be less cars with public transportation. I would have to be convinced it was going to be used. Ridership is key.

I am against it because of the high cost & if fares were expensive. You need to expand door to door transit for the elderly and handicapped in the whole area, like door to door for those with special needs in the region.

There is a great need for it and people would use it. I am against it because it is too expensive in terms of taxes.

I am for it because of the availability for those who need it. I am against it because of the cost in terms of fares.

The convenience for people who don't have ways to get around; easier on younger people.

The tax issue of how much it would cost.

The money and who is going to have to pay for it.

The convenience of the service and the savings. Need bike transport capacity on a bus. I am against it because of the inconvenient bus stops, frequency of pickups, proximity of destinations, and tax costs.

It is a way to reduce cars on the road, but will probably not be used.

I don't consider it necessary.

I oppose a property tax increase.

It would be good for senior citizens, although new residents don't use public transit. I am not for increased property taxes.

To know the balance of cost and service and a lot more information.

I'm for it because of the convenience depending on the route and timing, but I am against the increased taxes.

I do not subsidize others transportation.

I would vote in favor only because of my kids.

The ability for the elderly to get around.

Because of the funding.

The taxes and funding.

The cost and likelihood that the system would be used.

I am against it because of low ridership levels that are possible. I don't like to see empty buses. It is a low priority issue.

It would be cutting down on traffic, but I am against it because it would raise property taxes.

I am for it if it has a better & fairer funding approach. I am against it because they need to find another way to find users to pay for it. It is not fair for property owners to pay for a system they would not use.

I believe it would be used more than 50% of the time. They need efficient times for bus riders. I am against it because it is not a widespread transit system.

I am for it because it is needed. It is a nice alternative to cars. It is good for poor people and useful for kids. It would make travel locally smarter, especially from an energy point of view. I am against it because it would be another possible tax and possibly no one would use it.

I am for it because of gas prices and gas conservation.

It would be good for those who don't have transportation. I am not sure it would be easy for visitors to Bozeman. I'm not sure about the impact on taxes. Our area residents are very independent.

We do have the need for it, but I am against it because of the cost.

If I knew people would use it, ridership levels verse percentage of people who would use it. I would vote against it if I knew it had low ridership levels.

Depends on the area it serves and the cost to ride. I would be against it because I'm not sure of ridership levels.

Because of the need for it. We lack public transit. The cost is prohibitive, who's paying the cost?

I would be for it because of the well planned, collaborative effort between the cities and county. Involve MSU students and faculty and multiple campus pickup sites. I am against it because they tried to do too much too fast.

Depends on how it is structured and set up.

I think it is a good idea and it would be helpful, but I am opposed of any more tax increases.

I know people who need or would use it. There is a necessity for it and the mobility of local residents. I'm not sure Montana residents will give up their independent spirit to ride a bus system.

I would need the layout of the bus routes estimated.

I am against being funded by property taxes.

The cost would make me vote against it.

I would vote for it if I knew people who would use it.

I need more information on the amount of property taxes.

It would help the traffic flow.

To know the cost and frequency of pickups.

I need to know the property tax amounts.

Because it would help the traffic flow and the environment.

I'm not sure.

We need a bus system.

Whether or not it serves MSU.

If it was for the elderly people and people that don't have a car.

It depends on how much taxes go up.

How would it be financed?

If it served the elderly.

Depends on how much taxes would increase.

I would not support it if it caused more taxes.

I would vote against any more taxes.

I would vote against I think the money should be spent on schools.

If service included areas outside the City.

I don't think we need one.

Nothing would cause me to vote against it.

Bus service was not used when it was tried before so I don't think it would work again.

How well it was planned.

I'm against subsidizing with our taxes. I think we pay enough.

If it raised property taxes, I don't want to vote for it.

How is it funded?

I would be against the bus system if it raised taxes.

I would need to know more.

The convenience, usability, and affordability.

The traffic situation.

We really need one for others that can not get around.

It would give those without transportation a way to get around.

I would be against it if it raised taxes.

I would have to see a lot of community support. Most people are not inclined to use the system.

I might vote for it. I feel sorry for the residents that don't have others to transport them where they need to go.

I would like to see some sort of public transit system here.

If I knew more people that needed the bus I would vote for it, but everyone I know has a car.

Traffic is getting too crowded in town.

I am voting for a bus service.

I don't want any new taxes.

The cost.

I am not sure that one is needed.

I would vote against it because I wouldn't use it.

Depends on the route of the bus.

If it was convenient and useful.

It depends on the cost & accessibility to those that need it.

We need one.

It depends on routes & handicap access.

Depends on routes and charges for service.

The way that it would be funded.

It depends on how it would be funded.

The way it would be funded.

Depending on the funding and the bus schedules would influence whether I am for it or against it.

It would depend on the way they would fund it, and whether or not we need a transit system.

Generally, I would vote for it because I think it is needed unless the taxes would be outrageous.

I would be against a bus system if it would include any new taxes.

We need a system, but it needs to cover more areas. The county and city governments need to work together.

I would vote against it because it would be a waste of money.

There are people who need transportation to get to the doctor, work, etc. so I would support this issue.

I would support it if it was funded by other sources.

I would favor more public transit depending on the details.

I am very against higher taxes. It also should be run by a private party.

I need to see the cost and usage, also taxes to lower them.

I would vote for it for people that don't have cars.

It depends on how high the taxes are going to be raised.

Knowing the community has a big need for this.

My confidence in its planning & implementation that it was set up right and smartly planned.

The cost.

The property taxes.

How well I thought it was organized and how well it relieved congestion in traffic patterns.

Depending on the cost to ride the bus is how I would vote.

The traffic safety, how it relieves the congestion, service for disabled and elderly, and bike and pedestrian safety.

If it was used for taxes.

The cost of the bus system.

I think it is necessary so I would vote for it.

I would vote against a new bus system.

How much taxes are increased.

I would vote against a bus system.

I would need more information.

Taxes getting higher would make me vote against a bus system.

I don't use the buses but I feel that it is needed for those who do use them.

The size of the busses and how many buses there will be.

It depends on the cost of a bus system.

I would vote for because the county needs public transit.

We need one for elderly and we are growing.

It depends on who it services.

If cost was huge to the tax payer.

We need it.

It depends on how high our taxes go.

If I knew people would use it I would vote in favor of it.

If there was another way to fund for the bus system without raising property taxes, I would vote in favor.

It must be very convenient and affordable for all ages and areas. I would be more likely to vote for it if seniors, disabled persons, low income residents and teenagers were promised & guaranteed a graduated rate.

Who or how the bus system would be funded would be my major concern. However, I would not vote for a new bus system, because I don't see a personal or community need for one. If I was convinced of its need for either, I would vote for it.

If it didn't take money away from issues like healthcare or public schools and if the property tax increase was reasonable.

If sales taxes were used as the main funding sources and there were no property tax increases.

Only if property taxes funded the bus system would I vote for it.

I would not vote for a bus system because I do not see a current or future need for the services it would provide. I don't want taxes of any sort to increase for such an unnecessary service. Public schools need more money to pay teachers better and supply students with better resources.

I would not vote for the bus system because I live in a rural area where the bus probably would not come near and be useful to anyone in my neighborhood. I will vote against it if it tries to raise my property taxes.

I would vote against the initiative to start a bus system if it suffered the funding for the county jail and if it raised my property taxes.

I would be influenced to vote for the bus system if it was easily accessible to those in need, whether those who need it be the elderly, disabled, or low income people. I would not vote for it unless it was supported by property taxes and some federal funds.

I am for it because it saves on driving.

I don't know if there is sufficient demand to justify the cost.

I would vote for it because I don't have a driver's license. I am against it because of the low ridership level.

To vote for it I would need good factual information., comprehensive public analysis and disclosure. I would vote against it because of the lack of detailed analysis and disclosure of relevant data.

I'm for it because it would help other residents to save money. I'm against it because of the cost it involves and who foots the bill.

I would like to see projected need, use and expense, upkeep and funding before deciding.

I would vote in favor of public transportation. It has to be better than using a taxi.

I would vote for it. I know so many people that need public transportation and I want it to be there when I need it.

I would not vote for it. I just don't see the need.

It would depend on the cost and funding. We live outside of town and I don't think we would benefit from the service.

I want to know, what new taxes?

I am against it if it will raise my property tax.

It depends on how my taxes will be affected.

I would vote for it because of the fact that it would help with traffic flow in the city.

It would reduce traffic if we had a bus system.

I like the idea of having a bus system.

I need more information and the cost of effectiveness.

I need more information on the basic plans for the system.

I would not use the bus system so my influence depends on the cost.

It all depends on the cost.

The traffic problems influence me to vote for a bus system.

I would vote against because it would add to, taxes like property taxes.

It depends if it is going to be used, and if it would actually decrease traffic on the streets.

Depends on what it is run on, like what type of gas they would run the bus on.

It would help college students and those who do not have transportation.

The money needs to be put into infrastructure development for the future.

I would vote for the bus system because I have a member in the family that would benefit from the service and I know the community would benefit as well.

I would vote for it because the community needs a public transit service. People need to have another choice besides cars.

A public transit does not work. It has not been successful. We've tried it before.

I do not think it would be used by enough people. The property tax would be too high.

I don't think it's a government issue. No raising property taxes!

I'm concerned about the cost of the service and if we could benefit from the service and how easy the bus service would travel through traffic.  
There is no need for a bus system.

I think the bus system is needed. It would be better on gas consumption and better for the environment.

I would just vote against a bus system.

I need more information.

I am not sure about the property tax issue.

I would vote for a bus system.

I am concerned about the study behind it. If not much research is done, then I would not support it.

It would be a good deal to have if they could make a go of it.

I would need to know more about the cost and administration of the system.

We live in a rural area, no need for a bus system.

I don't think it will happen. The trails commission talked and planned and that never happened either.

It would depend on the routes and the need for service.

First of all, how many buses to start with? Can and how will the bus system support itself?

I would need to know if the need for a bus system is really there.

I am a seasonal resident, not registered to vote in Montana, but I do own property here so I am aware of the issues.

I need to know more on how my property tax rates will be affected.

I would need to see the plan for funding, tax rates, bus schedules and the need for it.

Because of the lack of public transportation, there is a need for it.

I would need to know the expense or fare of using the bus. Will there be family passes, will it be affordable? Folks driving SUV's won't be the ones needing the bus, it must be affordable. What about upkeep? How much and where will the money come from?

I would vote for it because there is a lack of public transportation and there is a need for it.

My decision would be based on if and how much my property taxes would increase.

It depends on how it is funded and how much my property taxes would increase.

If I knew it would benefit a lot of people, I would vote for it.

It would depend on funding and how my taxes would change.

I'm for it because it helps people who earn less. I'm against it because of how much the tax increase will be.

I would not use the bus system so I would not vote for it. I don't want property taxes to increase.

I will vote against any bus system initiative that will raise my property taxes. I do not see a personal or community need for such an initiative.

I don't want property taxes to increase for a bus system that would only benefit a small and insignificant group of people in this county.

I need more information on the community's need for it and who would fund the project.

I see a need for a bus system that goes everywhere on a more regular basis. Galavan and Bobcat Transit are not convenient systems.

If it wasn't going to raise the property taxes too much, then I would vote in favor of the bus system.

I would need to know more about the cost.

I would vote for it based on the fact I am 83 years old and don't have my own car.

It would depend on where the funding is coming from and how much my taxes will be increased.

I would like to know how well the service for senior citizens will be handled.

There is a clear need for it.

I'm not certain a true need exists for this!

Because of the money it would cost I would vote against it.

I would vote for it because of the heavy traffic.

It depends on the details, the cost and the coverage of the area.

People do not use mass transit systems so I would not vote for it.

I vote on anything.

I would vote for it if there were reasonable routes and times.

Because there's no system near me and there are a lot of older people in the area that need it.

There is more of a need for it in the future.

I would be influenced because of it helping the community.

It would depend on the property tax funding.

I'm not sure of the funding needed through property taxes.

The property tax issue.

I'm not entirely sure because of the funding for the bus system.

I would be against the bus system because of the funding.

The community is too small. I do not think it would be successful.

I do not think the community needs a bus system. I feel that Gallatin is too small. We need to improve Galavan.

I need more information on the details, like frequency and stops.

I think I would vote for it.

Our area needs it. Fuel supplies and larger populations are pushing us towards some sort of mass transit rather than everyone driving cars.

If it was self supporting and did not increase taxes.

I do not think a mass transit system is needed.

I am for it because it aids the legally blind, but include the MSU community into the system planning. I am against it because it's too politicized, badly contracted, and mishandled tax dollars. Paralysis by analysis.

I'm not sure what would influence me for or against it.

Nothing would influence for or against.

I need to be convinced of the ridership levels. I am against it because of the possible low ridership levels and the cost of the system. Perhaps you're starting too large initially. You need to start small and expand.

I would vote for it because we need it. Too many vehicles!

I would vote for it because it's easier to get around. I would vote against because of how high the fares are.

It is a good idea.

I would vote against if it will raise taxes on my house. We need a bus system, but not by increasing property taxes.

I would vote against as I don't see there is a need nor the volume to support itself.

I would vote for it based on the current traffic issues and growth.

I would like to see some type of survey or study as to the number of folks that would be using the service.

I think public transportation is a good idea. I can't think of any reason to vote against it.

It would depend on the routes and areas serviced.

Concerned about the cost.

I'm for it because it would cut down on traffic. I'm against it because it will be an extreme tax increase.

I'm for environmental issues to help traffic congestion. I'm against it because property tax would increase.

I think it would be more convenient to have a bus system.

I am voting against the new bus system because we don't need higher taxes. The taxes are high enough already.

I would vote for it because the MSU students would benefit from the bus system and be able to afford housing.

I wouldn't vote in favor of the bus system because I wouldn't personally need or use it.

I would vote against the bus system because property taxes are already too high.

I just don't think there is any need for it.

I just don't think it would work because people don't use it.

I need the details on how it would be implemented.

I'm not interested in another property tax rate increase.

I am against it because of the price of the taxes and the routes.

I am for it because there would be less traffic in peak times and it would reduce drunk drivers. It all depends on the property tax rate.

It would help with traffic. It would also give an alternative way to get around town, but you need to use clean emission buses, not diesel. I am against it if clean emission buses are not used. Also, there are too many other issues on the ballot.

It depends on how much it will cost the taxpayers.

I would probably vote against the bus system because the area really isn't large enough to have it.

It will depend on how much of an increase it will be on our taxes.

I would vote for it because of the population increase and traffic increase.

I would vote for it because I have no other means of transportation. I would vote against it because I don't want any tax increase.

I'm for it because it's not a bad idea. It would cut down on the traffic. I am against it because the taxes are outrageous now.

I am for it because it will save on gas costs to the individual. I am against it because of the cost of the bus system.

I am for it because I live a great distance from everything. I am against it because of the very minimal stops. You need multiple stops, more than a limited service.

I'm for it because I need a public transit system alternative. I am against it because it is poorly planned.

It would be nice to take a bus instead of a bike or drive. I would drive less.

It depends how much it would cost.

I am for it because of accessibility. I am against it because of the rate on the property taxes.

It would help people get around easier, but I'm against it if it is too costly.

I need to know how much property tax would be used and could a sales tax be used instead of property taxes going up?

How much would property taxes be raised?

Knowing how many people would actually use it would influence me.

I am not registered to vote.

I need more information to decide yes or no on a bus system.

Because the bus system is needed for our community.

The need for a bus system in our community would influence me.

I would be influenced to vote for it if property taxes weren't raised.

I would be more likely to vote in favor if property taxes didn't go up too high.

The cost and if service would be improved for senior citizens.

I do not think the population is large enough.

The taxes involved. I would need to know how much.

I would need to know the cost.

I would be influenced because of the taxes and the change of the area. It would not service me because of the city limits.

Yes I will vote in favor of the bus system. It's important for the elderly and people with disabilities.

It depends on what our needs are.

Nothing either way would influence me.

I would vote against no matter what.

The area is in need of transit service especially to service people with disabilities.

I would need to know the cost and where it would run.

I do not think the community needs a public transit service because the population is not large and the service would not do well.

I do not think it would be used.

I would not vote in favor because it is not needed and we would never use it.

If it would lower the taxes.

It would cut back on some of the traffic problems.

I would vote for it.

I would vote in favor for the bus system if I was convinced people would use it.

I don't know how to answer the question because I would need more background information such as bus routes, paying fee, etc.

I would base my decision on the fees charged to ride the bus.

I would vote in favor for the bus system if it was convenient and the fees charged to ride the bus were affordable.

I would vote in favor it is wasn't overly priced and if property taxes weren't tremendously raised.

If we weren't overly charged to ride the bus, then I would vote in favor.

I would need more information on the plans of the bus system.

I have not decided on the subject of a bus system.

I do not believe roads to the different areas are good enough now. There needs to be improvements to the roads before mass transit comes about.

I do not see a need for a mass transit system at this time. The current service is never full now.

Knowledge of the total cost would make me vote for or against.

It's a good idea for senior citizens.

I am against it because it's too high a raise in taxes.

The value of how people will use it would influence my vote.

If there were additional tax issues, I would vote against.

I wouldn't vote either way until a transportation study was done.

I would rather see the roads repaired first.

I want it to be affordable and convenient.

I would vote in favor for the bus system, if I were convinced people would use it.

I don't want to have a raise in property taxes.

It would be less traffic.

I don't have any idea at this time.

I'm for it if the plan is not expensive.

I would need to have more information like the cost, how many people would benefit, etc.

I have MS and a need for public transportation that can handle my wheel chair. It's bigger than what Galavan can handle.

It would depend on how my property taxes would change.

It would depend on what happens to the property tax.

I would need to know how much the taxes would be.

I need more information to study first.

The amount of vehicles on the road and the amount of gas consumption would influence my vote.

I do not need any influence.

Nothing would influence me to vote for it. Everybody would still keep driving their own cars.

If the plans served the area well.

I need to know where the service will run.

I feel the area needs a bus system.

Nothing would influence me.

We really need it and I would vote for it.

It is needed and I would vote in favor.

The growing need of the city would influence me.

I would vote against it because I wouldn't use it, neither would anyone in my household.

If I would be influenced in the future I would be influenced.

How much would taxes increase?

It would decrease traffic congestion.

It would depend on where the district lines would be and how much it would cost and whether or not I would benefit.

I don't know at this time.

I would vote against it if it raised property taxes.

How would it be funded?

I need to know how much it would cost.

I think it is a good idea. They are convenient and a good idea.

I would support an independent, non-governmental service. If taxes would be too high, I will oppose it.

I would need to know where the money is going to come from.

I would be influenced for or against depending on the plans and the cost.

It would depend on the preparation and the planning.

The cost is what I would be influenced by.
